

The leader in above-ground
solar cable management

Under Panel Cable Management

CAB® Solar offers a variety of cable hanger designs to meet all of your under panel cable management requirements. Manufactured from galvanized, high-tensile spring steel, our PVC-coated hangers are not only corrosion-resistant, they are easy to install with no special tools required. CAB® Solar under panel hangers significantly reduce installation time compared to cable ties, clips, or clamps and simplify upgrades, maintenance, and troubleshooting. CAB® Solar's cable hangers are designed to last for the life of the project and to keep wiring secure, saving on future O&M costs. Additionally, under panel hangers are highly effective in bifacial panel projects and can be custom-designed for your next project.

:: Manage all types of cables
under solar panels

:: Reduce labor installation time

:: Customize designs as needed

:: Simplify upgrades, maintenance,
and troubleshooting

Torque Tube Hanger
options shown
here and above.

Contact our Solar Team at **814.472.5077** to learn more about Under Panel Cable Management solutions or for information about our full range of CAB® Solar cable management products.

TORQUE TUBE HANGERS

Made to fit octagonal, square, round and other shapes of torque tubes, these hanger options are available ready-to-install at the time of cable placement or later. Available uncoated upon request.

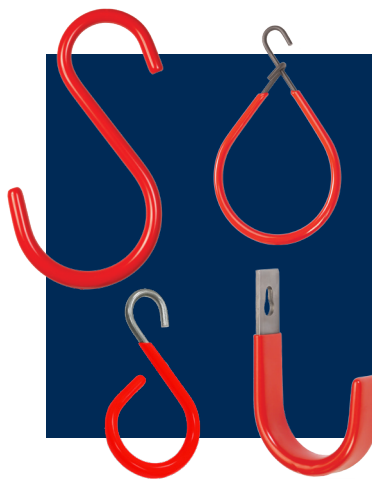

MODULE CLAMP HANGERS

Utilize the clamp fitting to place a Module Clamp Hanger to secure cabling. Low-profile styles are available for fixed-tilt structures.

PIER MOUNTED HANGERS

Protect cable running over piers from wear caused by movement with the use of a Pier Mounted Hanger.

CUSTOM-DESIGNED HANGERS

CAB® Solar offers a variety of hanger options including Latchbacks, J-hooks, and S-hooks. Our engineering team can work with you to devise a solution perfect for your needs.
